

# FORT KNOX

For more information  
about **these locks**  
simply scan this  
code:

**Iron padlocks**  
Good basic padlocks, mainly for privacy purposes.

**Brass padlocks**  
Stronger than iron, for low-security purposes.

**Laminated padlocks**  
Stronger than iron, made of laminated plates.

**Combination padlocks**  
For privacy purposes, does not need a key.

**Weatherproof padlocks**  
For outdoor use to keep dirt out.

**Shrouded padlocks**  
Protected shackle is difficult to cut.

**Insurance padlocks**  
High-strength locks for higher security purposes.

**Discus padlocks**  
High-strength locks that are more difficult to saw or cut.

## Keyed Alike (KA) padlocks

A selection of Fort Knox padlocks are available in sets of multiple locks that all use the same key. These are ideal for situations where a number of locks are needed but having multiple keys is a burden.

Multiple padlocks that open with **ONE KEY!**

## What do the ratings mean?

**Good:** Mainly privacy. Lockers, cupboards, luggage, top bags etc.

**Better:** General use + entry level security. Toolboxes, toolboxes etc.

**Best:** General use + higher security. Security gates, trailers etc.

**Specialised:** Unique features for specific applications. High risk security gates, gate motors etc.

**2-Lever mortise locks**  
Ideal for indoor and outdoor use where privacy is the primary concern, such as bathrooms, bedrooms etc. Keys are readily available and easy to copy in the event of loss.

**3-Lever mortise locks**  
Used indoor and outdoor where security is moderately important as 3 lever locks offer greater resistance to picking than 2 or 3 lever locks. It is advisable to use a keyhole blocker for extra security if needed.

**Euro Profile mortise locks**  
Euro Profile locks offer greater resistance to picking than 2 or 3 lever locks. These locks use a separate barrel for the lock mechanism, which can be replaced on any request.

**Door Handles**  
Handles are available in a large variety of materials, styles and finishes. The range has something to suit any style and pocket. While Euro Profile locks require the correct kind of handle, other 2 or 3 lever locks all use the same system and handles are interchangeable.

**Spare Keys**  
Duplicate and replacement keys for 2 Lever and 3 Lever locks can be purchased. Be sure to know the key-code you require. Keys available M10 to 32, Y 01 to 18 and M12 to 53.
